

### **1 to 1 PowerTower**

The **1 to 1 PowerTower** is a standalone disc to disc duplicator requiring no PC connection that can duplicate a single master CD to a CD-R/RW at up to 52 times speed, resulting in an exact replica of a 650 Mbyte disc in just over 3 minutes. **16x DVD PowerTower** also available.

### **1 to 3 PowerTower**

The **1 to 3 PowerTower** can duplicate up to 3 CD-R/RWs simultaneously from a single 650 Mbyte disc in just over 3 minutes at 52x speed. This versatile duplicator is also available with **8x or 16x DVD drives**. A hard drive is fitted for storing images - 80Gb for the CD model and 120Gb for the DVD.

### **1 to 7 PowerTower**

The **1 to 7 PowerTower** can duplicate up to 7 CD-R/RWs simultaneously from a single 650 Mbyte disc in just 3 minutes at 52x speed. This versatile duplicator is also available with **DVD drives** and can copy seven 4.7 Gbyte DVDs at 12x speed. A hard drive is fitted for storing images - 80Gb for the CD model and 120Gb for the DVD.

### **1 to 14 PowerTower**

The **1 to 14 PowerTower** can duplicate an amazing 14 CD-R/RWs simultaneously from a single 650 Mbyte disc in just 3 minutes at 52x speed. An 80Gb hard drive is fitted for storing images.

### **Automated Printers:**

The **CopyDisc OptiPrinter Pro**, with its high speed, precision robotics will automatically load and unload discs into an OptiPrinter Pro inkjet printer making the task of printing CDs & DVDs quick, easy & hands-free. With a capacity for 220 discs, the CopyDisc

OptiPrinter Pro offers fast, efficient unattended printing of CDs & DVDs and is available as either a standalone or a networked system

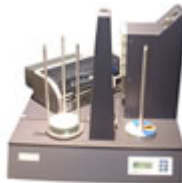

The **NEW Vision** printer is a cost effective solution with a resolution of up to 5760\* dpi capable of producing discs in outstanding quality.

The Vision prints directly to the surface of CDs and DVDs as well as paper and uses standard Epson cartridges.

The **NEW OptiPrinter Pro**, designed and manufactured by Verity Systems & Hewlett-Packard, is a second generation, color printer capable of printing directly onto the surface of CDs or DVDs at an incredible 4800 dpi resolution. The **OptiPrinter Pro** builds on the success of its predecessor, the OptiPrinter, with additional features, enhanced quality, more efficient performance and improved styling.

## CopyDisc4

The new **CopyDisc4 OptiPrinter Pro** combines the new 4800 dpi OptiPrinter Pro inkjet printer and the Verity Systems range of automated duplicators. With a 220 disc capacity, high speed drives and outstanding print quality, users can expect very professional duplication and printing of their CD-Rs and DVD±Rs.

The **CopyDisc 8P and CopyDisc 8 PRO** are the latest addition to the family of Verity Systems CD & DVD publishing systems, featuring 8 high speed drives, an incredible 1100 disc capacity and the choice of either the Prism Plus or the PowerPro II thermal printers

Packaging:

## **VS650 CD Packer**

The brand new, **VS650 CD Packer** is a semi automatic machine for packing CDs and DVDs into regular jewel cases and slim-line jewel cases. It will also place accompanying booklets.

The **VS4000** has been specially designed to provide a professional CD jewel case wrapping facility. Operators wishing to wrap small to medium quantities of cases can now achieve a quality finish equal to the standard of more expensive finishing machines. The VS4000 is a table top mounted unit with a throughput of 300 per hour.

## **Artcoater and Artcoater Auto** **UV Coating Stations - CD coating or DVD coating**

Discs which have been inkjet printed are liable to damage from moisture, light and everyday handling. Coating your inkjet printed CDs and DVDs with a lacquer will protect against these problems and now with the introduction of the new Artcoater, the first ever desktop UV Coating Station, you can do so quickly, easily and safely.
